

Kill Team — Targeting Quick Reference

PART 1 — CAN I SHOOT? (Run through in order, stop at first NO)

STEP 1 — CHECK YOURSELF

Do I have ENGAGE order?
YES → continue NO → CANNOT SHOOT
(Exception: weapon has SILENT keyword → can shoot anyway)

STEP 2 — CHECK MY POSITION

Am I within 1" of ANY enemy operative? (control range)
NO → continue YES → CANNOT SHOOT

STEP 3 — CHECK TARGET VISIBILITY

Can I draw an unobstructed 1mm-wide line from MY HEAD to any part of
TARGET'S MINIATURE (not base)?
YES → continue NO → CANNOT SHOOT (not visible)

STEP 4 — CHECK IF TARGET IS A VALID TARGET

See the TARGET STATUS TABLE below.
Valid → continue Not Valid → CANNOT SHOOT

STEP 5 — CHECK FOR FRIENDLIES

Are any FRIENDLY operatives within 1" of the TARGET? (their
control range)
NO → ☐ YOU CAN SHOOT YES → CANNOT SHOOT

PART 2 — TARGET STATUS TABLE (Step 4 above)

Target's Order	Target in Cover?	Valid Target?	Defender Gets Cover Save?
ENGAGE	Not in cover	☐ Valid	☐ No save
ENGAGE	In cover	☐ Valid	☐ Yes — free normal save die
CONCEAL	Not in cover	☐ Valid	☐ No save
CONCEAL	In cover	☐ NOT VALID — cannot target	—

When is a target "in cover"? There is intervening terrain (Light, Heavy, or Wall — not Exposed) within the target's control range (within 1" of them), AND the target is NOT within 2" of you (the shooter). Exposed terrain (ladders, grates, terrain feet) never counts as cover.

PART 3 — SHOT MODIFIER TABLE (after confirming valid target)

These don't block the shot — they change how your dice work:

Situation	Effect on Dice
Target in cover, Engage order (Light or Heavy terrain)	Defender keeps +1 free normal success before rolling
Target obscured — Heavy terrain between you, >1" from both operatives	Attacker discards 1 success; all crits become normals
Target in cover AND obscured	Both apply — lose a success AND defender gets free save
Target behind Light terrain only	Cover save only — no obscured penalty
Target behind Exposed terrain only	Nothing — no cover, no obscured
Target behind Wall terrain	Cover save + obscured (but usually LoS is blocked entirely first)
Shooting through a window (valid LoS)	Normal cover/obscured still apply based on other terrain
Shooting through a window in a fortified position	Piercing is ignored by defender
Seek weapon	No cover save for target
Saturate weapon	No cover save for target
Piercing x weapon	Target rolls x fewer defence dice
Brutal weapon	Target can only block with critical successes

PART 4 — CAN I FIGHT (MELEE)? (much simpler)

STEP 1 – CHECK RANGE

Is the enemy within 1" of me (horizontal distance only)?
NO → CANNOT FIGHT YES → continue

STEP 2 – CHECK VISIBILITY

Can I draw an unobstructed 1mm-wide line from MY HEAD to any part of TARGET'S MINIATURE?
YES → ☐ YOU CAN FIGHT NO → CANNOT FIGHT

No order restriction for Fight — you can fight on either Engage or Conceal. No cover or friendly restriction for Fight — cover only affects shooting. No "valid target" check — Conceal order doesn't protect against melee.

PART 5 — TERRAIN TYPE MATRIX

This is the core of most confusion. Each terrain type has different effects on Line of Sight, Cover, and Obscured.

Terrain Type Effects

Terrain Type	Blocks Line of Sight?	Gives Cover?	Causes Obscured?	Notes
Light	☐ No	☐ Yes	☐ No	Most crates, barrels, low walls
Heavy	☐ No*	☐ Yes	☐ Yes (if >1" from both)	Large ruins, thick walls, big containers
Exposed	☐ No	☐ Never	☐ No	Ladders, grates, feet of terrain — never counts as intervening
Wall	☐ Yes — fully	☐ Yes	☐ Yes	Solid walls; LoS and movement blocked completely
Insignificant	☐ No	☐ No	☐ No	Ignored for movement height; operatives move over freely
Accessible	☐ No	☐ Yes	Depends on type	Can move through but costs extra 1"
Blocking (gaps)	☐ Yes (gap only)	☐ Yes	☐ Yes	Gaps/undersides that LoS cannot pass through

*Heavy terrain does NOT block line of sight on its own — it causes Obscured instead. LoS can still be drawn through it; the target just gets the obscured penalty.

How Cover Works With Terrain Types

Cover requires intervening terrain within target's 1" that is not Exposed and target is not within 2" of shooter.

What's between you and the target	Cover?	Obscured?
Light terrain within target's 1"	☐ Cover save	☐ Not obscured
Heavy terrain within target's 1"	☐ Cover save	☐ Also obscured (if >1" from both of you)
Exposed terrain only	☐ No cover	☐ No obscured
Wall terrain	☐ Cover save (if within target's 1")	☐ Obscured
No terrain at all	☐ No cover	☐ No obscured

PART 5b — WINDOWS & DOORS

Windows

Default rule: LoS cannot be drawn through a window unless you or the target is within 1" horizontally of it.

Your distance from window	Target's distance from window	Can you draw LoS through it?
Within 1"	Anywhere	☐ Yes
Anywhere	Within 1"	☐ Yes
More than 1"	More than 1"	☐ No — LoS blocked

Additional window rules:

- ▶ Weapon special rule Piercing is ignored when shooting through a fortified window (bunkers/stockades).
- ▶ If LoS is valid through a window, normal cover/obscured rules still apply based on terrain between you and the target.

Doors & Hatches

Door State	Terrain Type	Blocks LoS?	Blocks Movement?	Cover/Obscured?
Closed	Heavy + Wall	☐ Yes	☐ Yes	☐ Both
Open	Accessible + Insignificant + Exposed	☐ No	☐ No	☐ Neither

How to open a door/hatch:

- ▶ Operate Hatch (1AP): Open or close a hatchway. Cannot do this if an enemy is within your control range, or if the hatchway/access point is in an enemy's control range.
- ▶ Breach (2AP, or 1AP with Piercing 2+ weapon / breaching charge / breach marker): Permanently opens a breach point. Nearby operatives may take damage (roll D6: on 4+ take damage equal to half result, and APL -1).

Fighting through a closed door:

- ▶ Use the Door Fight action — select an enemy on the other side of the door within 2" while your operative is touching the door.
- ▶ Normal fight rules apply otherwise.

PART 5c — HEIGHT INTERACTIONS

Kill Team measures horizontal distance only — height doesn't count toward range.

Situation	Rule
Two operatives on different floor levels	Horizontal distance still only 1" for control range, but visibility may be blocked by the floor/ceiling terrain between them
Shooting down from a high floor to a low floor	Check line of sight — if the floor is solid terrain blocking the line, no LoS → cannot shoot
Shooting up to an operative on a ledge	Same — need unobstructed LoS from your head to any part of their miniature

Situation	Rule
Enemy is on a vantage point (terrain >2" high)	They can jump down up to 4" horizontally; you can shoot them normally if LoS exists
Cover when on different levels	Cover still applies — if there's intervening terrain within the target's control range (even a railing or ledge edge), they may be in cover
Obscured when on different levels	Heavy terrain must be between you and the target along the targeting line — height changes the angle of that line

PART 6 — FULL SHOOT/FIGHT DECISION AT A GLANCE

Want to SHOOT?	Want to FIGHT?
☐ I have ENGAGE order? ☐ I'm NOT within 1" of any enemy? ☐ Target is VISIBLE to me? ☐ Target is valid? - ENGAGE → always valid if visible - CONCEAL + NOT in cover → valid - CONCEAL + IN COVER → ☐ STOP ☐ No friendly within 1" of target? → GO — check modifiers table above	☐ Enemy within 1" (horizontal)? ☐ Enemy is visible to me? → GO — order/cover don't matter

PART 7 — CONTROL RANGE REFERENCE

Control range = within 1" AND visible (mutual — applies to both operatives).

Used For	How
Fighting	Must be in enemy control range to Fight
Shooting restriction	Cannot shoot if you are in any enemy's control range
Friendly fire restriction	Cannot shoot at a target if a friendly is in the target's control range
Cover	Target needs intervening terrain within their own control range
Objective markers	Contesting/controlling requires being within control range of the marker
Assisted fighting	Friendlies in the enemy's control range (not in another enemy's CR) help improve your Hit stat

CHEAT CARD (print or screenshot this)

SHOOT CHECKLIST	FIGHT CHECKLIST
☐ I have ENGAGE order (or weapon is SILENT) ☐ I'm NOT within 1" of ANY enemy ☐ Target is VISIBLE (see LoS rules) ☐ Target is VALID: • ENGAGE order → always valid • CONCEAL, no cover → valid • CONCEAL, in cover → ☐ cannot shoot ☐ No FRIENDLY within 1" of target	☐ Enemy within 1" (H) ☐ Enemy is visible → DONE. Fight. No order/cover checks.
MODIFIERS after valid target confirmed: In cover (Light/Heavy, Engage) → +1 free save Obscured (Heavy terrain >1" from both) → lose 1 success, your crits become normals Light terrain only → cover save, NO obscured Exposed terrain → nothing at all	
TERRAIN at a glance: LIGHT → cover save only HEAVY → cover save + obscured (if >1" from both) WALL → blocks LoS fully (also cover + obscured) EXPOSED → never cover, never obscured (ladders, grates, feet)	
WINDOWS: LoS blocked through window UNLESS you or target is within 1" horizontally of the window	
DOORS (closed = Heavy+Wall = fully blocks LoS+movement): Open with Operate Hatch (1AP) – can't if enemy in CR Breach (2AP, or 1AP with Piercing 2+/breaching charge) Fight THROUGH closed door with Door Fight action (within 2")	
IN COVER = non-Exposed terrain within target's 1", AND target NOT within 2" of you (shooter) (H) = horizontal distance only – height doesn't count
